Analysis instructed by: _____ Date/ signature _____	
Sample type:	<input type="checkbox"/> Compressed yeast <input type="checkbox"/> Granulated yeast <input type="checkbox"/> Liquid yeast <input type="checkbox"/> Active dry yeast <input type="checkbox"/> Instant yeast <input type="checkbox"/> Yeast products
Sample name:	
Date of sampling:	
Packaging:	Refrigeration needed: <input type="checkbox"/> yes <input type="checkbox"/> no
Sample quantity:	
Analytes:	
<input type="checkbox"/> Yeast dry substance	<input type="checkbox"/> Wilde yeasts
<input type="checkbox"/> Raw proteine	<input type="checkbox"/> Total bacterial germination count
<input type="checkbox"/> Phosphate	<input type="checkbox"/> Milk mould (geotrich.cand.) <input type="checkbox"/> Moulds
<input type="checkbox"/> Colour <input type="checkbox"/> Jodine test	<input type="checkbox"/> Total Coliforms
<input type="checkbox"/> pH-value <input type="checkbox"/> Solubility	<input type="checkbox"/> Escherichia coli
<input type="checkbox"/> Sodium chloride content	<input type="checkbox"/> Salmonella
<input type="checkbox"/> Raising power <input type="checkbox"/> Standard dough <input type="checkbox"/> Sugar dough	<input type="checkbox"/> Listeria
<input type="checkbox"/> Stability of dough raising power	<input type="checkbox"/> Staphylokokken <input type="checkbox"/> Staph.aureus
<input type="checkbox"/> Organoleptic test <input type="checkbox"/> Marketability	<input type="checkbox"/> Bacillus cereus
<input type="checkbox"/> Trehalose <input type="checkbox"/> α -Glucan <input type="checkbox"/> β -Glucan <input type="checkbox"/> Fat <input type="checkbox"/> Glutathione <input type="checkbox"/> Total carbon hydrate <input type="checkbox"/> Ash	<input type="checkbox"/> Pseudomonas
<input type="checkbox"/> Nutritional value determination, including fibres	<input type="checkbox"/> Lactobacillus
<input type="checkbox"/> NIR- rapid determination
